(54) Title: ADHESIVE CLOSING DEVICE PROVIDED WITH A SWITCHING CIRCUIT

WO 2004/062415 A1

(57) Abstract: The invention relates to a closing device (1, 101, 201, 301) consisting of a plurality of adhesive closing elements (2) in the form of a hook, mushroom head or elasp. The inventive closing device (1, 101, 201, 301) comprises a flat support (3, 103, 203, 303) and the adhesive closing elements (2) protruded from at least one surface (4) of the support (3, 103, 203, 303). Said invention is characterised in that said adhesive closing device (1, 101, 201, 301) is provided with at least one switching circuit (5, 503) comprising at least one electric and/or electronic component (6, 106, 7, 107, 207, 307).
